ADVENTURES
IN GERLOS

THE SORCERER'S
CURSE

THE CRYSTAL OF
WISHES

1. The first crystal is hidden deep in a forest protected by a tower to the west and bordering the Bear Forest to the south. Find the hunter's cabin there. Every hour when the sun is at its zenith, the call of an animal will tell you the location of the hiding place. Three numbers will give you access to the crystal. Look for the tracks of three animals in the hunter's cabin and on the map of Solregia.

1. Wrinklebrother can be found in a dense wooded area bordered by watchtowers to the north and west. 2. Stones shall reveal, whether you're tiny or tall, the magical word to make Wrinklebrother answer thy call let grief be followed by hope and love

2. The crystal's second shard is hidden in an area where to the south a watchtower stands and to the east a mountain rises into the sky. Look for the bee colony there that will lead you to the hiding place.

The right path is lined by two small rocks on the left, followed on the right by a large rock and then a tree stump, before you pass a pond on the left and finally another small rock.

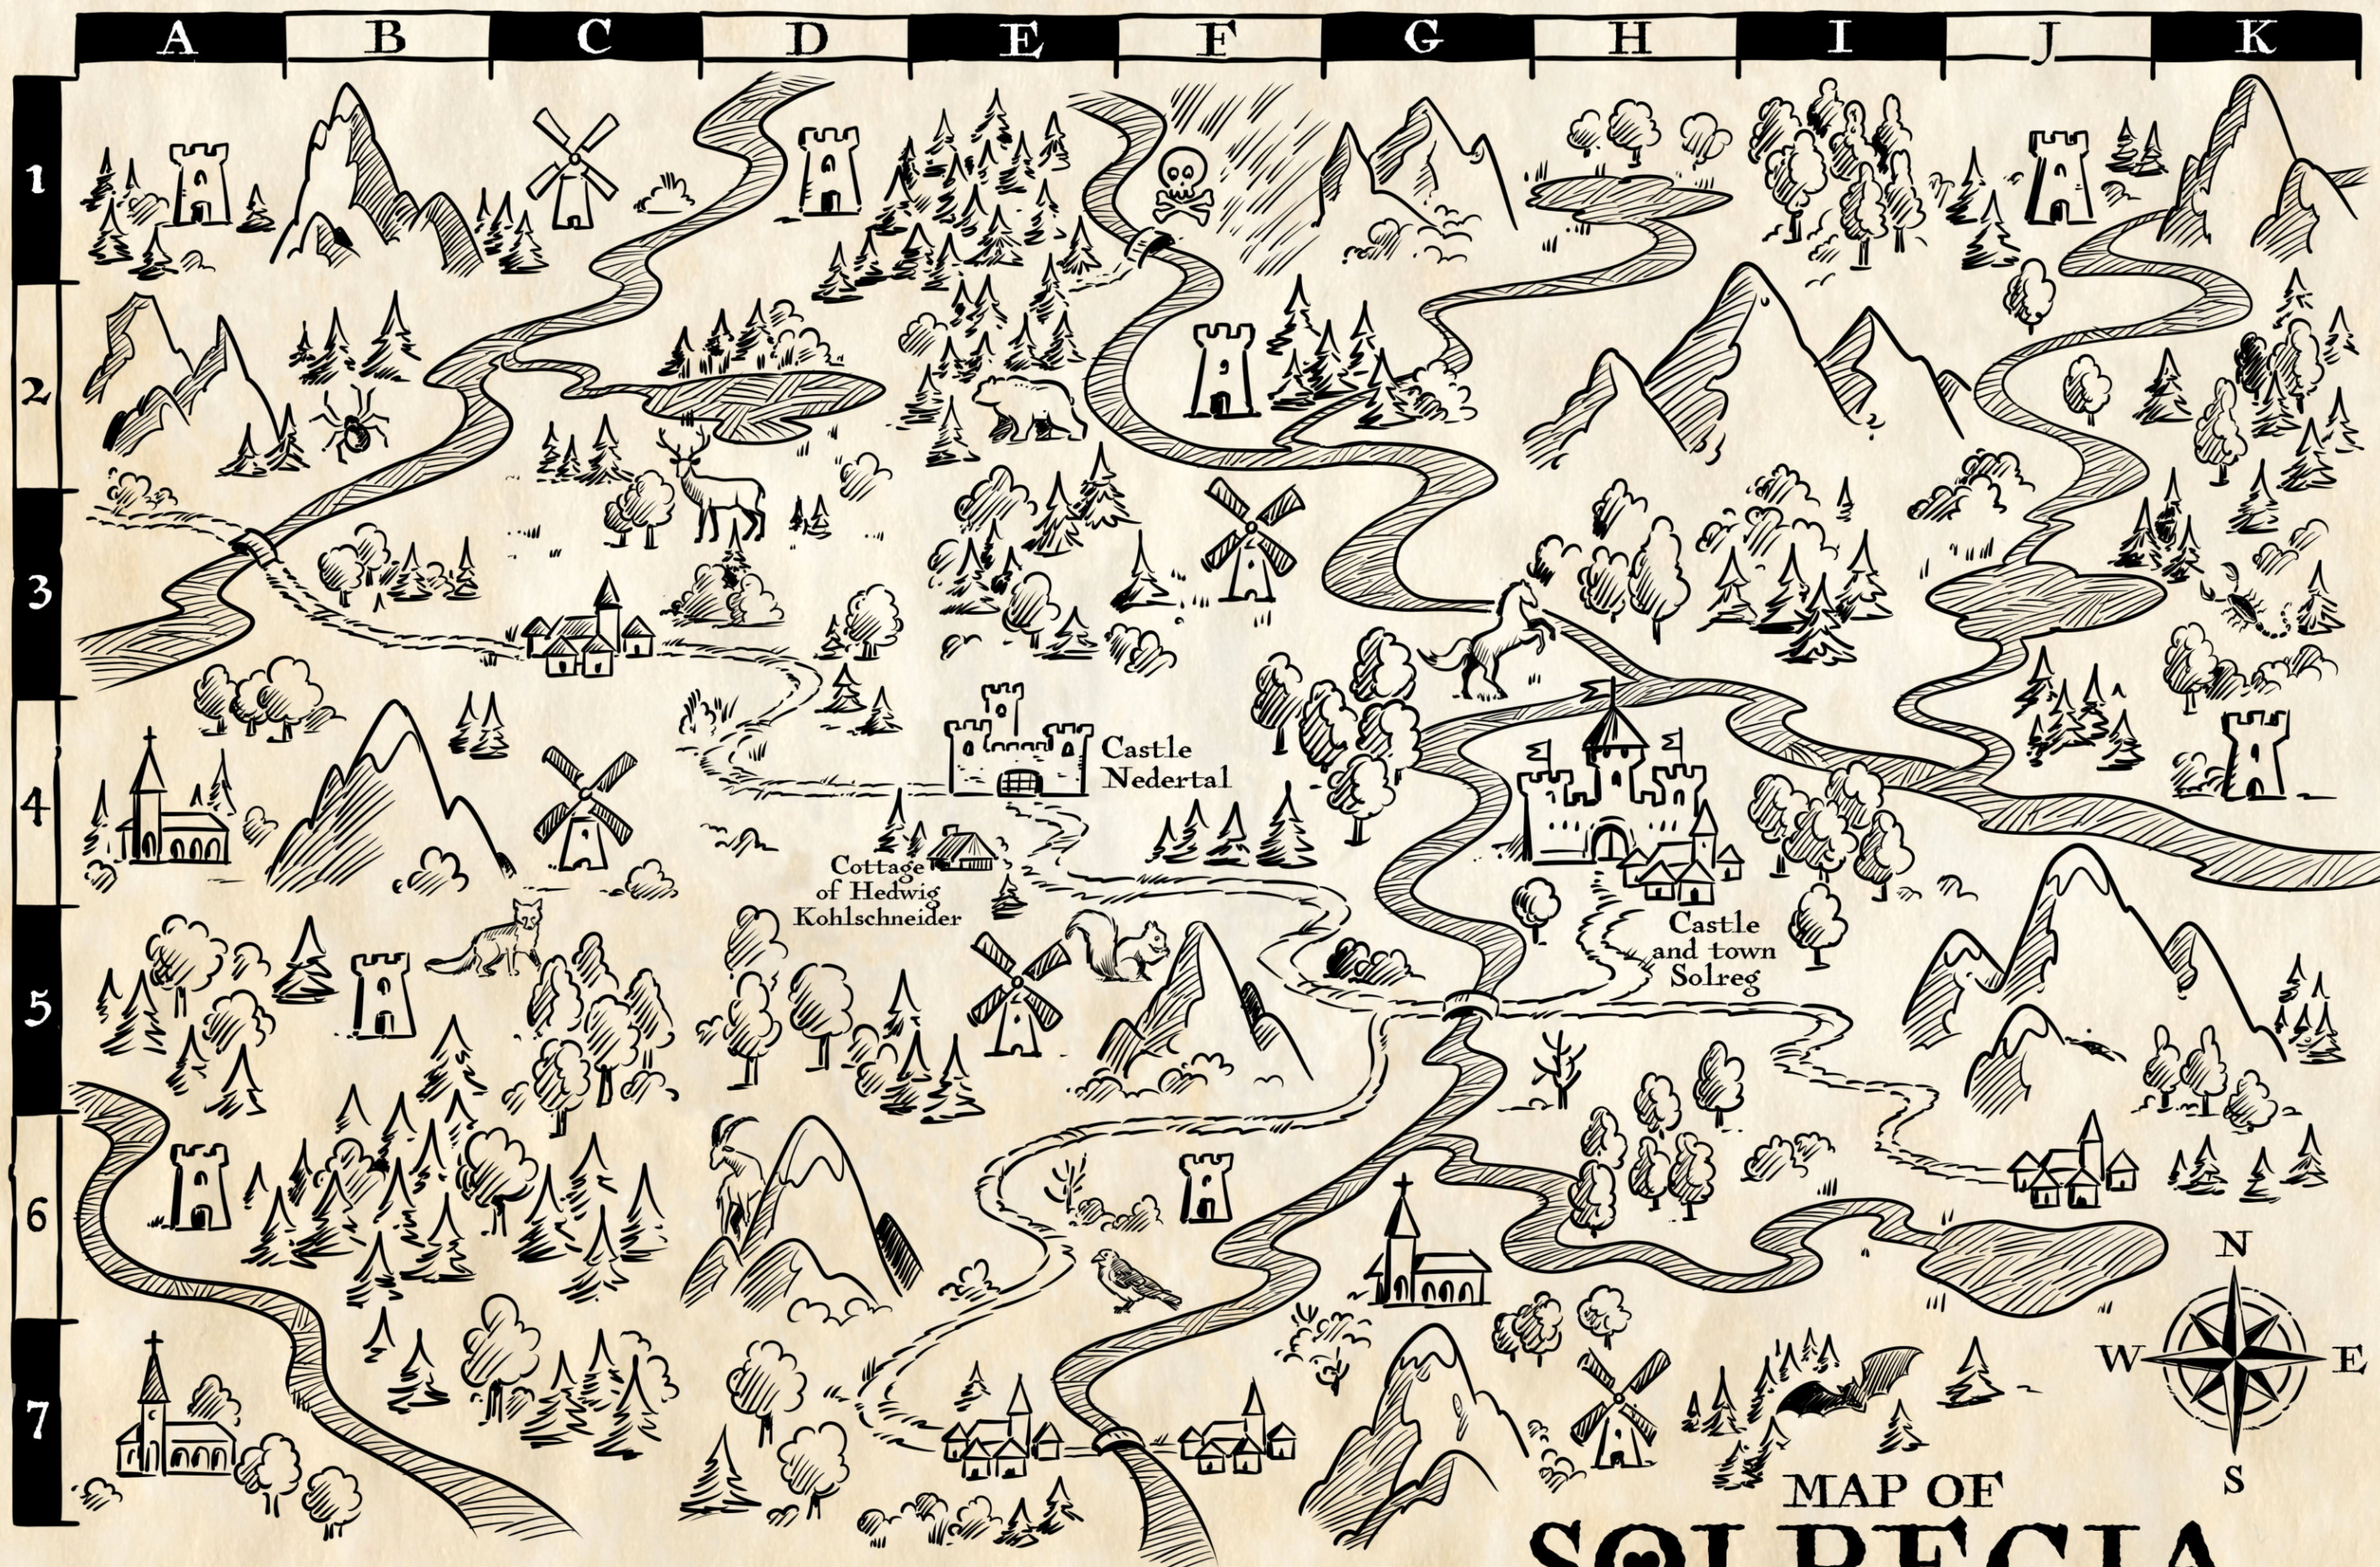

3. The third fragment of the crystal is hidden in the depths of a mountain. Four animals on the map of Solregia placed around the second crystal will reveal the location. Connect the two animals in the west and the two in the east and it will reveal itself. Create the right sounds and the crystal is yours!

4. Where a watchtower stands to the south, the blades of a windmill turn in the west and the bells of a monastery church ring out from the south-east, a tunnel leads you into a sacred forest whose animals guide you to the secret grotto that holds the fourth and final shard of the crystal.

By the river of wild waters, where
carnies greet you,
quietly question a gateway to the soul!
In its world of light and glorious splendor,
it reveals you the truth very wisely.
Reflects everything like quiet, calm
mountain lakes.
Confuses left and right but will show you
the right way round.
